

Exactpro Group

May 2020

Exactpro specializes in quality assurance services and related software development with a focus on financial market infrastructures. At Exactpro, we believe in meritocracy and equal opportunity for all our employees. We have been able to attract and retain a superb technical team of talented engineers. Exactpro staff are technically advanced, responsible, proactive, thorough, flexible and responsive to clients' requests and needs. Clients worldwide, including half of the top 20 exchange groups, trust us due to our reliability and track record.

To help our clients and partners understand our business and values better, Exactpro has voluntarily published its gender pay gap figures. We treat everyone in our team as individuals and not as members of any identity group. We recognize that different people have different interests and priorities. The best software testing instrument is the human brain, and our business benefits from a wide diversity of thought and opinions.

At Exactpro, we do our best to treat everyone fairly. We stay focused on providing the necessary growth opportunities for our staff. Two-thirds of our management team started with Exactpro on entry-level positions. We are very happy that our managers are able to help us drive the company forward after their parental leave.

2019			Combined population	598
	Male	Female	Mean	Median
Q4	67%	33%	-1%	-14%
Q3	74%	26%	1%	0%
Q2	75%	25%	-1%	-1%
Q1	61%	39%	5%	8%
Top10%	57%	43%	17%	-7%
Total	68%	32%	-8%	1%

Approximately 32% of Exactpro employees are women. This reflects the situation with technology talent available on the market. The proportion of women is slightly higher within our management. We are not able to attribute it to a single factor or a small set of factors. The observed gender pay gaps are related to the employees' distribution across positions and roles. Exactpro is strictly compliant with the legal requirement to pay men and women the same for equal work. The Exactpro management has no immediate plans to redress the situation. We recognize that it is not possible to achieve equality of outcome without quotas and other discriminatory measures.

The median is the figure that falls in the middle of a range when the wages of all relevant employees are lined up from the smallest to the largest. The median gender pay gap is calculated based on the difference between the middle employee in the range of male wages and the middle employee in the range of female wages.

The mean is calculated by adding up the wages of all relevant employees and dividing the figure by the number of employees. The mean gender pay gap is calculated based on the difference between the mean male pay and the mean female pay.

The presented figures exclude the company's co-CEOs and ultimate beneficiaries. – two males and two females. Eighteen specialists on parental leave for the whole year were excluded. The figures are based on 2019 annual data and represent aggregated annual figures instead of a monthly snapshot.
